

Summit UCS Client

Collaborate and listen

Summit is back with a brand new edition of powerful unified communications capabilities for your small to mid-size business. The Summit UCS Client gives you the tools you need to listen, communicate and collaborate with customers more quickly and effectively, from your desktop or smartphone. So you can respond to customer calls faster using sophisticated multimedia capabilities that make you more productive ... wherever you're working.

Integrated directly in the Vertical Summit™ UC platform, Summit UCS Desktop, UCS Desktop with Voice and Summit UCS Mobile Clients give you automatic access to the system's rich voice features, as well as a wide range of video, text and messaging capabilities with the click of a mouse or tap of a finger. The UCS client's intuitive graphical user interface (GUI) is easy to use and can be customized to fit the needs of individual users to help improve productivity and reduce customer response time.

Through the Summit UCS Client on your desktop or smartphone, you can:

- Make, receive and transfer calls from anywhere
- Send and receive secure IM, text and broadcast messages
- Communicate quickly with a single-number, in or out of the office
- Improve call handling with at-a-glance, presence-based call management and individual call routing
- Access corporate directories, call logs, paging and other system features with the click of a mouse or swipe of a finger
- Place calls directly from Windows-based Web pages and document files with optional ClickCall software*
- Share applications, white boards and desktops in real time
- Easily set up and manage videoconferences with up to six people
- Conduct 3-way conference calling
- Record calls with a single click
- Automatically integrate and synchronize private and shared directories with your contacts and schedule for more efficient communications

*Separate license required
